

Beta Presentation

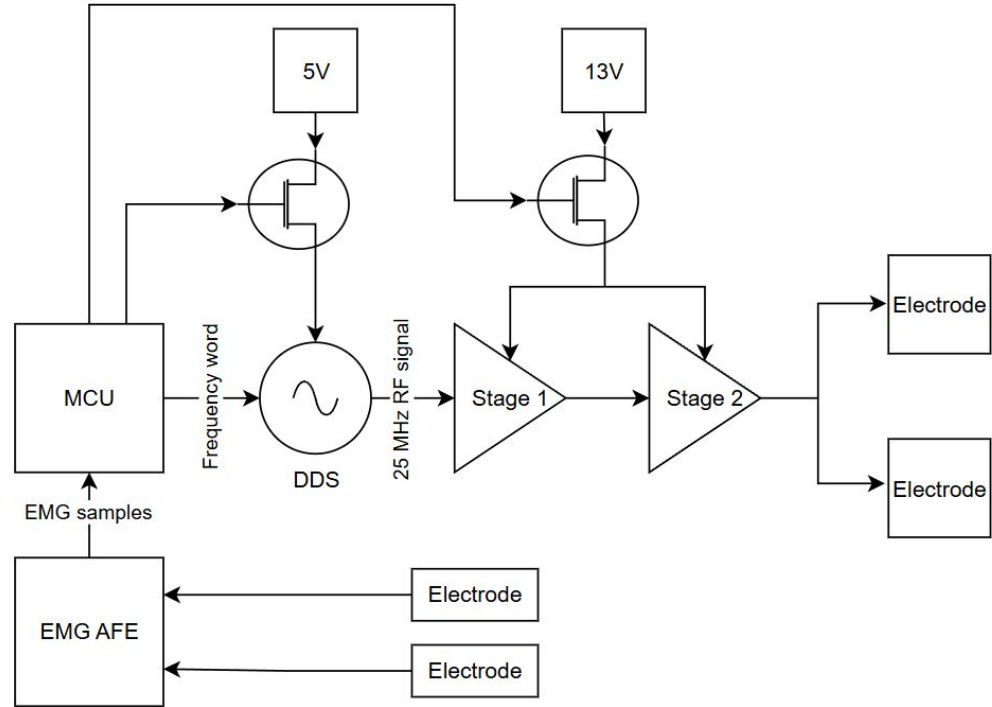

DTCP Implant Power Transmitter

Problem Statement

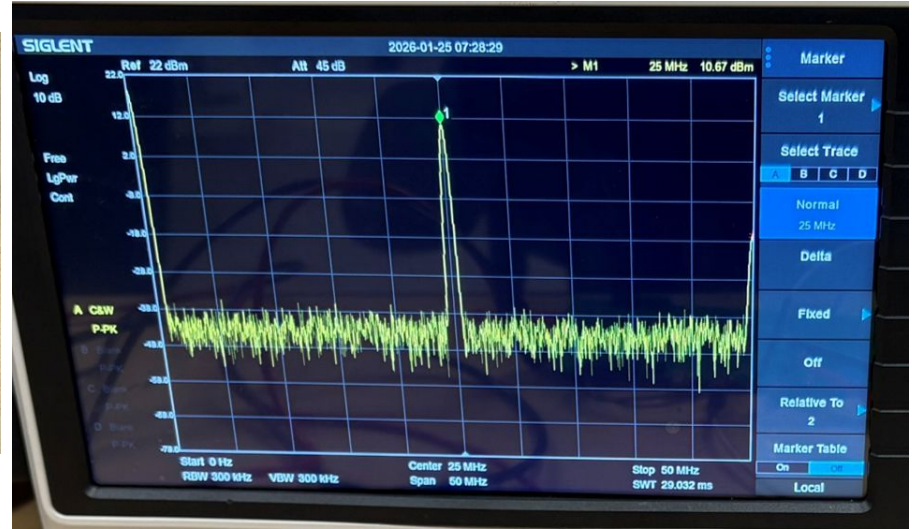

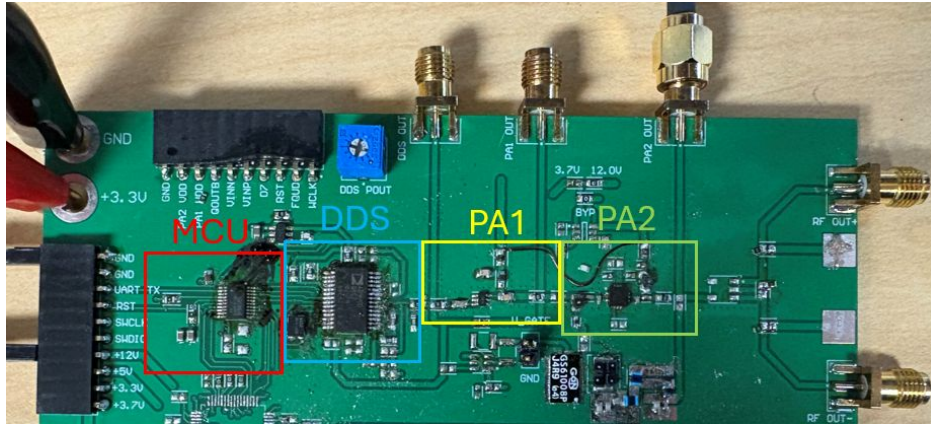

Project Overview

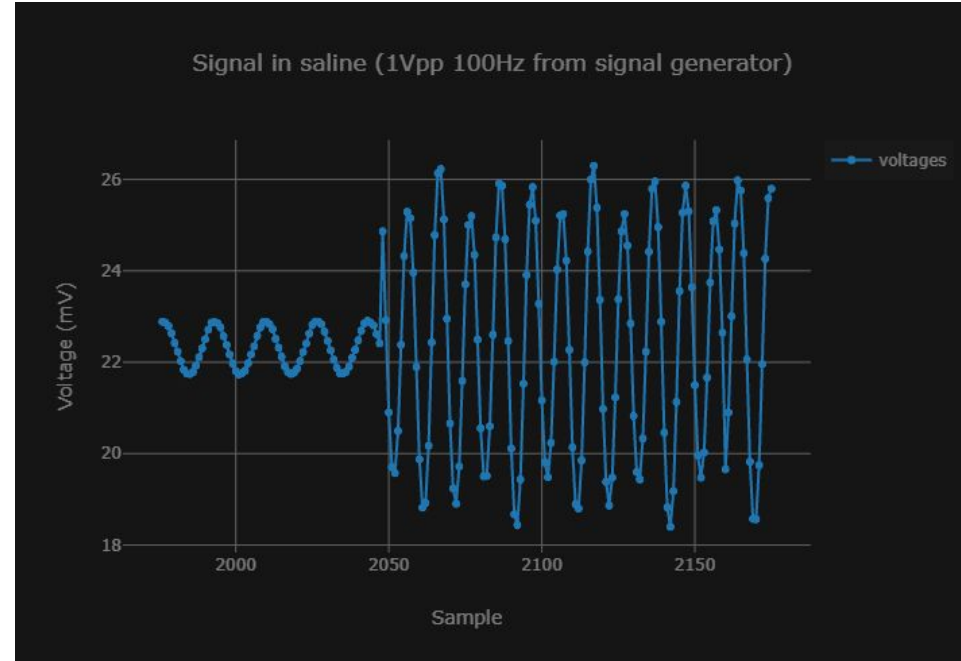

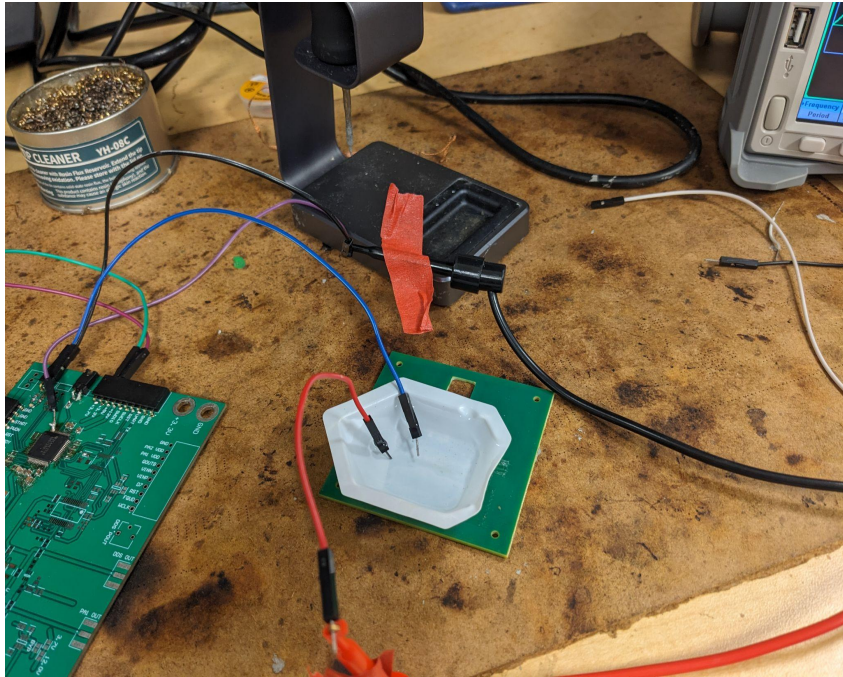

Performance metric	Target value
Output frequency	25 MHz
Output power	≥ 30 dBm differential
Static current	< 10 mA
Tx current	< 1500 mA
EMG noise floor	< 0.5 mV

Current State of Project Work: RF transmitter

Current State of Project Work: EMG recording

Plan of Action

Milestone	Finish by:
Second PCB design complete and submitted for fabrication.	2/28/2026
Firmware integrated into a single program.	3/14/2026
Second PCB design received and assembled.	3/21/2026
Second PCB design fully functional and validated.	4/15/2026
